Michael J. Izzo  
Building & Fire Inspector

Steven E. Fews  
Assistant Building Inspector

In the event of a storm, wind, rain or flood event, please keep in mind these simple guidelines with respect to electrical systems, natural/L.P. gas equipment and sanitary systems to help ensure the safety, health and welfare of you, your family, your property and the community at large.

- **Do not attempt to touch or move any downed or low-hanging electrical power lines. Report damaged power lines to the Rye Brook Police Department at, 937-1020.**
- **Flooding can damage your electrical system. Report flood damaged electrical equipment to the Rye Brook Police Department at, 937-1020. Do not attempt to use any electrical outlets or other electrical components or equipment damaged by water.**
- **Flooding can cause your natural or L.P. gas heating / hot water systems to become unsafe. Report flood damaged heating equipment to the Rye Brook Police Department at, 937-1020. Do not attempt to use flood damaged gas heating / hot water equipment.**
- **Do not remove the caps on your sanitary sewer house traps in an attempt to drain flood water. This is a violation of Westchester County and NY State Health Codes, and will cause a sewer back-up allowing raw sewerage to contaminate your home through the opened trap.**
- **Any damaged electrical system must be repaired by a Westchester County Licensed Electrician.**
- **Any damaged gas heating or hot water equipment must be repaired by a Westchester County Licensed Plumber or H.V.A.C. Contractor.**
- **All electrical repairs must be inspected by the Village Electrical Inspection Agency prior to being energized. Please contact the Building Department at 939-0668 for further information.**
- **All natural or L.P. gas system repairs must be inspected by the Village Building Inspector prior to being put back in service. Please contact the Building Department at 939-0668 for further information.**
